

February 27, 2012

Danny, Karl, just a note to thank you for helping with our TJC inspection this week. The inspection required additional testing and as usual you were there for us with no notice.

I am use to depending on you for the semiannual inspection and reports on or air balancing; those reports were very well received by the Surveyors.

Also when you inspect , Karl has a great feel and does the actual balancing and makes recommendation which does put our facility on track for right air flows , air exchanges and pressurization.

Thanks again

Brian McDonald
