To Whom It May Concern:

I have worked with Design Balance over the past eleven years. My experience has always been positive and the test and balance work performed had always been professional. I find that their knowledge base is high which reflects on the services provided. The reports are prepared in a very organized manner and are accurate reflecting installed conditions and providing a summary of any existing or potential problems. I would not hesitate in recommending their services for any project. Projects that I am familiar with include hospitals, schools, office government facilities and retail.
